About the Institute

Sir C.R.Reddy College of pharmaceutical sciences was established in 2007 to prepare graduates in pharmacy to meet their ever - increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The college is PCI and AICTE approved. The objectives of the college are to establish and maintain an outstanding professional education programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health, to conduct outstanding research and service programmes to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines. SIRCRRCOPS runs the UG and PG courses like B. Pharm established in 2007 with 60 seats, Pharm. D established in 2014 with 30 seats and M. Pharm established in 2011 with Pharmaceutical technology – 18 seats, Pharmacology -18 seats and Pharmaceutical Analysis and Quality Assurance- 18 seats.

About the Department

The Department of Pharmaceutics was established in 2011 with equipments like Tablet punching machine, Dissolution apparatus, Orbital shaking incubator, 8-Basket dissolution apparatus, Brookfield Viscometer, Hot air Oven, Stability chamber, Disintegration apparatus. The major apparitions for the Department are to inculcate how the me-too active pharmaceutical ingredients can be converted into outcome-oriented as well as patient-friendly end user formulations.

The basic knowledge about pharmaceutical technology and the proper way to get patent for their innovative ideas are the additional unique features of the program blended with the presence of highly-reputed faculty members with vast experience.

About the Programme

- To learn about documentation which done for each step of formulation preparation.
- To gain knowledge about sops of different instruments in industry.
- To know about adverse effects in cleaning areas of meachines.

Objective of the Programme

- GMP is designed to minimize the risks involved in pharmaceutical product and for ensuring that products are consistently produced and controlled according to quality standards.
- GLP is designed to ensure the quality and integrity of test data related to non- clinical safety studies.

Topics to be Covered

- Introduction to GMP, About quality control & quality assurance
- GMP norms & GMP for herbal medicine
- Sanitation & hygiene, Qualification & validation
- Product quality complaints
- Adverse reactions / events
- Product recall & contract production & analysis
- Self-inspection & personal involved & training
- Premises, production area, equipment, materials
- Documentation & good practices in production
- Good practices in QC, sampling, testing, Packing & labelling

About the Institute

Sir C.R.Reddy College of pharmaceutical sciences was established in 2007 to prepare graduates in pharmacy to meet their ever - increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The college is PCI and AICTE approved. The objectives of the college are to establish and maintain an outstanding professional education programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health, to conduct outstanding research and service programmes to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines. SIRCRRCOPS runs the UG and PG courses like B. Pharm established in 2007 with 60 seats, Pharm. D established in 2014 with 30 seats and M. Pharm established in 2011 with Pharmaceutical technology - 18 seats, Pharmacology -18 seats and Pharmaceutical Analysis and Quality Assurance- 18 seats.

About the Department

Pharmacology is the science which deals with effect of drugs. The main objective of pharmacology is to provide scientific data for choosing a drug treatment of proven efficacy and safety from the various options available. A wonderful arena for research oriented students is being provided by the well-equipped laboratories with CPCSEA approved animal house facility in our college. The Pharmacology department is engaged in imparting knowledge on various aspects of preclinical and clinical Pharmacology through proper media.

The department goal is to prepare students for productive and successful careers in pharmaceutical industry, academia, research and public sectors.

About the Programme

- To get knowledge about new advances in clinical trials for major diseases.
- How to manage critical conditions in major diseases.
- To know about drugs monitoring in diseases.

Principal
Sir C.R.Reddy College of

About the Institute

Sir C.R.Reddy College of pharmaceutical sciences was established in 2007 to prepare graduates in pharmacy to meet their ever - increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The college is PCI and AICTE approved. The objectives of the college are to establish and maintain an outstanding professional education programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health, to conduct outstanding research and service programmes to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines. SIRCRRCOPS runs the UG and PG courses like B. Pharm established in 2007 with 60 seats, Pharm. D established in 2014 with 30 seats and M. Pharm established in 2011 with Pharmaceutical technology – 18 seats, Pharmacology -18 seats and Pharmaceutical Analysis and Quality Assurance- 18 seats.

About the Department

The goal of the Department of Pharmaceutical Analysis is to concentrate on the creation of analytical techniques employing fresh pairings of tried-and-true techniques and instruments. It entails conducting fundamental research on the composition, stability, identity, and purity of excipients, starting materials, and active pharmaceutical components (API). The department is engaged in post-graduate student instruction and training in analytical sciences related to qualitative and quantitative estimate of natural and synthetic substances in various matrices by application of spectroscopy, chromatography, and analytical procedures.

About the Programme

- To gain knowledge about analytical equipment usage in industries
- To get an idea about analytical parameters in elucidation chemical constituents.
- To know about research procedures.

Objective of the Programme

- To show that the drug offers the desired effectiveness in many patients.
- To establish the identity, purity & potency of drugs including the drugs bioavailability & stability.
- To provide assurance of the quality, safety, & efficacy of new medicine.

Topics to be Covered

- Titrimetric and Gravimetric
- Colorimetric & ultraviolet Spectrophotometric
- Electrochemistry
- Fluorimetric
- Flame photometric & atomic absorption spectrometric
- Chromatography
- Hyphenated techniques
- Standardization and quality control of herbal drugs and formulations
- Flow injection and sequential injection analysis
- Analytical Method Validation

PROGRAMME REPORT

Name of the Programme: "A TWO WEEK CERTIFICATE PROGRAMME ON RECENT DRUG DISCOVERY AND ANALYTICAL TECHNIQUES UPDATES"

Date: 10 / 09 / 2018 to 24 / 09 / 2018.

Resource Person: Mrs. P Geetha Bhavani ,
Associate professor,
Dept. of Pharmaceutical chemistry,
Vikas Institute of Pharmaceutical Sciences,
Rajahmundry.
Phone no: 9581491323
Email ID: cherriyanpuri@gmail.com

Name of the Co-ordinator: Mrs. E. Jajili,
Assistant Professor ,
Dept. of analysis.

Number of students attended: 13 (1 Year MPharm)

Venue: Lecturer Hall-3(Room No.27), Sir C R Reddy College Of Pharmaceutical Sciences

Objectives:

- To show that the drug offers the desired effectiveness in many patients.
- To establish the identity, purity & potency of drugs including the drugs bioavailability & stability.
- To provide assurance of the quality, safety, & efficacy of new medicine.

Topics covered:

- Titrimetric and Gravimetric
- Colorimetric & ultraviolet Spectrophotometric
- Electrochemistry
- Fluor metric
- Flame photometric & atomic absorption spectrometric

Learning outcomes:

- Understand continuous & interconnected activities which are to be conducted throughout the drug development process.
- Knows the importance of analytical techniques for separating analytes & quantify target molecules.
- Understand the importance of testing to ensure that the products used to make the drugs are safe.

About the Department

Pharmacology is the science which deals with effect of drugs. The main objective of pharmacology is to provide scientific data for choosing a drug treatment of proven efficacy and safety from the various options available. A wonderful arena for research oriented students is being provided by the well-equipped laboratories with CPCSEA approved animal house facility in our college. The Pharmacology department is engaged in imparting knowledge on various aspects of preclinical and clinical Pharmacology through proper media.

The department goal is to prepare students for productive and successful careers in pharmaceutical industry, academia, research and public sectors.

About the Programme

- Usage of spectroscopy techniques for identification of chemical compounds in different formulations.
- Determining the quality of raw materials.
- Comparison of results of interpretation.

Objective of the Programme

- To ensure efficient use of medicinal supplies.
- To guide the clinicians, pharmaceutical personnel & all other health professionals to use the medicines rationally for the good of patients.

Topics to be Covered

- Introduction to pharmaceutical process validation
- General Principles and Practices of Process validation
- History and future of validation
- Importance of validation
- Stages of process validation
- FDA guidelines and GMP in Validation
- Process validation in Pharmaceutical industry
- Departments involved in process validation
- Protocol for Validation
- Validation Master Plan(VMP)
- Types of Process validation
- Process validation report
- Qualification and types of qualification

PROGRAMME REPORT

Date :

Name of the Programme: A TWO WEEK CERTIFICATE PROGRAMME ON
“PHARMACOEPIDEMOLOGY & PHARMACOVIGILANCE POST MARKETING
DRUG SAFETY STUDIES”

Date: 15 / 11 / 2018 to 30 / 11 / 2018.

Resource Person: Mr. M. Krishna,
Assistant Professor,
Dept. of Pharmacy practice
Sir C R Reddy College Of Pharmaceutical Sciences, Eluru.
Phone number: 7702060202.
Email ID : krisna.mannem@gmail.com

Name of the Co-ordinator: Mr. V. Mrudula Raj,
Assistant Professor,
Dept. of Pharmacy practice.

Number of students attended: 30 (III YEAR PHARM D)

Venue: Auditorium (Room No.52), Sir C R Reddy College Of Pharmaceutical Sciences

Objectives:

- To introduce the importance of pharmacovigilance on preclinical and clinical studies.
- How to differentiate between ADE and ADRs
- Process of reporting ADR to concerned authority.
- ICH guidelines for PV

Topics covered:

- Introduction to Pharmacoepidemiology and pharmacovigilance
- Importance of Pharmacovigilance in Pharmaceutical industry
- Pharmacoepidemiological study designs
- What are drug safety studies
- Role of postmarketing assessment

Learning outcomes:

- Session helped to get better understanding on clinical case study reporting.
- Created awareness on the PV regulation in India.
- Gave an opportunity to perform causality assessment.

About the Institute

Sir C.R.Reddy College of pharmaceutical sciences was established in 2007 to prepare graduates in pharmacy to meet their ever - increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The college is PCI and AICTE approved. The objectives of the college are to establish and maintain an outstanding professional education programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health, to conduct outstanding research and service programmes to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines. SIRCRRRCOPS runs the UG and PG courses like B. Pharm established in 2007 with 60 seats, Pharm. D established in 2014 with 30 seats and M. Pharm established in 2011 with Pharmaceutical technology – 18 seats, Pharmacology -18 seats and Pharmaceutical Analysis and Quality Assurance- 18 seats.

About the Department

The goal of the Department of Pharmaceutical Analysis is to concentrate on the creation of analytical techniques employing fresh pairings of tried-and-true techniques and instruments. It entails conducting fundamental research on the composition, stability, identity, and purity of excipients, starting materials, and active pharmaceutical components (API). The department is engaged in post-graduate student instruction and training in analytical sciences related to qualitative and quantitative estimate of natural and synthetic substances in various matrices by application of spectroscopy, chromatography, and analytical procedures.

About the Programme

- Usage of polarography in different formulations.
- To learn about operation of updated technology in polarography.
- To learn quantitative techniques in polarography.

PRINCIPAL
Sir C.R.Reddy College of
Pharmaceutical Sciences

Objective of the Programme

- To determine the concentration of solute and its nature respectively.
- To know the application of differential pulse polarography for the quantitative analysis of riboflavin in pharmaceutical samples & vegetables.

Topics to be Covered

- Overview of Polarography, types and techniques
- Instrumentation and Principles of Polarography
- Characteristics of polarography
- Types of electrodes and their pros and cons
- Types of currents in polarography
- Polarography measurements and Applications of Polarography
- Pharmaceutical applications (1) Dissolved oxygen and peroxides. (2) Trace metals and metal-containing drugs.
- Pharmaceutical applications (3) Antiseptics and insecticides. (4) Vitamins
- Pharmaceutical applications . (5) Hormones. (6) Antibiotics
- Pharmaceutical applications(7) Alkaloids. (8) Miscellaneous pharmaceutical substances.

PROGRAMME REPORT

Name of the Programme: "A TWO WEEK CERTIFICATE PROGRAMME ON ADVANCE USAGE OF POLAROGRAPHY IN PHARMACEUTICAL ANALYSIS"

Date: 21 / 01 / 2019 TO 04 / 02 / 2019.

Resource Person: Dr. V. Bhaskar Raju.

Professor & HOD

Dept. of Pharmaceutical analysis,

Sri Vasavi institute of pharmaceutical sciences,

Tadepalligudem.

Phone no:9491352334

Email ID:bhaskar.pharmaanalyst@yahoo.co.in

Name of the Co-ordinator: Mr. G. Kiran Kumar,

Assistant Professor,

Dept. of Pharmaceutical Analysis.

Number of students attended: 60 (II YEAR BPHARM)

Venue: Lecturer Hall-5(Room No.30) Sir C R Reddy College Of Pharmaceutical Sciences

Objectives:

- To determine the concentration of solute and its nature respectively.
- To know the application of differential pulse polarography for the quantitative analysis of riboflavin in pharmaceutical samples & vegetables.

Topics covered:

- Overview of Polarography, types and techniques
- Instrumentation and Principles of Polarography
- Characteristics of polarography
- Types of electrodes and their pros and cons
- Types of currents in polarography

Learning outcomes:

- Understand polarography is the dynamic electro analytical technique that can be conveniently & reliably applied for the determination of a wide spectrum of organic compounds.
- Understand the application of differential pulse polarography for the direct determination of aluminium in natural water.

About the Institute

Sir C.R.Reddy College of pharmaceutical sciences was established in 2007 to prepare graduates in pharmacy to meet their ever - increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The college is PCI and AICTE approved. The objectives of the college are to establish and maintain an outstanding professional education programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health, to conduct outstanding research and service programmes to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines. SIRCRRCOPS runs the UG and PG courses like B. Pharm established in 2007 with 60 seats, Pharm. D established in 2014 with 30 seats and M. Pharm established in 2011 with Pharmaceutical technology - 18 seats, Pharmacology -18 seats and Pharmaceutical Analysis and Quality Assurance- 18 seats.

About the Department

The Pharmacy practice department is established in this Institution in the year 2014 primarily, when the college had taken initiative to include the course Doctor of Pharmacy in this Institution. The main target of our department is to achieve positive outcomes from drug therapy, promote safe and rational use of medicine. The department plays a prominent role in health care system at hospital setup through well programmed pharmaceutical care services, with Pharm D program and the department has MoU with Government General Hospital, Eluru and collaboration with a multi-specialty hospital corporate hospitals such as Andhra hospitals, Good Samaritan Cancer and Government District Hospital and St. Joseph dental for the advance clinical pharmacy teaching, learning and practice process from 2015.

Department of Pharmacy Practice contains with its Institutional Drug Information Centre (DIC) collaborating with Hospital along with MICROMEDEX , CLINIREX and UP TO DATE software since from the inception of the department.

About the Programme

- To know about treatment of diseases by using artificial intelligence.
- To study about ethical committee issues.
- To learn about new techniques in disease diagnosis.

Objective of the Programme

- To design the system capable of thinking like human beings and able to diagnose the disease.
- To apply a process design tool for adapting a task utilise automation strategies in treatment of diseases

Topics to be Covered

- Introduction to AI, types of AI of relevance to health care
- Diagnosis & treatment applications
- Patient engagement & adherence applications
- Administrative applications
- Implications for the health care workforce
- Ethical implications
- The future of AI in health care
- Use AI for chronic disease management
- Empirical research and experimental outcomes
- Framework for AI in disease detection modelling
- Medical imaging for diseases diagnosis
Computed tomography
