**SIR C.R. REDDY COLLEGE OF  
PHARMACEUTICAL SCIENCES**

### About the Institute

Sir. C. R. Reddy College of pharmaceutical sciences was started to prepare graduates in pharmacy to meet their ever increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The objectives of the college are to establish and maintain an outstanding professional education Programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health to conduct outstanding research and service Programme to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines.

Sir.CRRCOPS runs the UG and PG courses like B.Pharm established in 2007, Pharm.D established in 2014 with 30 seats and M.Pharm in Pharmaceutical technology-18seats, Pharmacology-18 seats and Pharmaceutical analysis & quality assurance-18 seats.

### About the Department

The Department of Pharmaceutical Analysis focuses on the development of analytical methods using novel combinations of time-tested methods and tools. The composition, stability, identity, and purity of excipients, raw materials, and active pharmaceutical components (API) are all the subject of this fundamental research. The department is actively involved in teaching and training post-graduate students in analytical sciences linked to qualitative and quantitative estimation of natural and synthetic chemicals in various matrices by application of spectroscopy, chromatography, and analytical methods

### About the Programme

1. To make strategic plan a top priority
2. To develop cash flow planer

  
PRINCIPAL  
Sir C.R.Reddy College of

### About the Institute

Sir. C. R. Reddy College of pharmaceutical sciences was started to prepare graduates in pharmacy to meet their ever increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The objectives of the college are to establish and maintain an outstanding professional education Programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health to conduct outstanding research and service Programme to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines.

Sir.CRRCOPS runs the UG and PG courses like B.Pharm established in 2007, Pharm.D established in 2014 with 30 seats and M.Pharm in Pharmaceutical technology-18seats, Pharmacology-18 seats and Pharmaceutical analysis & quality assurance-18 seats.

### About the Department

The Department of Pharmaceutical Analysis focuses on the development of analytical methods using novel combinations of time-tested methods and tools. The composition, stability, identity, and purity of excipients, raw materials, and active pharmaceutical components (API) are all the subject of this fundamental research. The department is actively involved in teaching and training post-graduate students in analytical sciences linked to qualitative and quantitative estimation of natural and synthetic chemicals in various matrices by application of spectroscopy, chromatography, and analytical methods.

### About the Programme

The focus of the lecture was on issues and challenges related to Intellectual Property Rights of Artificial Intelligence. Artificial Intelligence is a combination of engineering and science, to manufacture machines by infusing intelligence in them that can solve problems and even act of perform activities like human beings. Use of complex discoveries and rapid growth have allowed artificial intelligence to evolve dramatically in its ability to perform all the human functions and can perform or act beyond a man's capacity to the point that the main emphasis has shifted from learning human functions to enhancing functional effectiveness. Advantages of artificial intelligence are diverse and have potential of ability to revolutionize many aspects of life, even in the universe of intellectual property

### Objective of the Programme

The main objectives of Sir C. R. Reddy College of Pharmaceutical Sciences in organizing this event is

1. To maintain Environmental, Social and Economic sustainability.
2. Creating a positive working environment

### Topics to be Covered

1. Address either environmental & social core Objective of the start-up.
2. Prior knowledge and focused attention towards Sustainability.
3. Blending a balance between profit, planet and people.

Date:.....

## Learning outcomes:

1. There is a growing interest in the nexus between patent laws and artificial intelligence today.
2. Patents are all about creativity and creation, and AI that is developing the ability to have human intellect can create inventions without human input.
3. Students know that AI systems can now independently produce original works.
4. Students gain clarification on who will own the copyright, patent, or any other intellectual property rights over the work or creation of AI.

### About the Institute

Sir. C. R. Reddy College of pharmaceutical sciences was started to prepare graduates in pharmacy to meet their ever increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The objectives of the college are to establish and maintain an outstanding professional education Programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health to conduct outstanding research and service Programme to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines.

Sir.CRRCOPS runs the UG and PG courses like B.Pharm established in 2007, Pharm.D established in 2014 with 30 seats and M.Pharm in Pharmaceutical technology-18seats, Pharmacology-18 seats and Pharmaceutical analysis & quality assurance-18 seats.

### About the Department

The goal of the Department of Pharmaceutical Analysis is to concentrate on the creation of analytical techniques employing fresh pairings of tried-and-true techniques and instruments. It entails conducting fundamental research on the composition, stability, identity, and purity of excipients, starting materials, and active pharmaceutical components (API). The department is engaged in post-graduate student instruction and training in analytical sciences related to qualitative and quantitative estimate of natural and synthetic substances in various matrices by application of spectroscopy, chromatography, and analytical procedures.

### About the Programme

- The course will give knowledge about importance of clinical research
- This session helps to give knowledge about Database or procedure testing
- This course helps to learn about protocol or study designing

### Objective of the Programme

The main objectives of Sir C. R. Reddy College of Pharmaceutical Sciences in organizing this event is

1. To know about the research
2. To learn about the early drug discovery process
3. To impart knowledge on Clinical trails, Observational studies.
4. To inculcate the principles of research
5. To identify a focus for future research and scholarly work
6. To develop special expertise in the corresponding clinical domain and research methods

### Topics to be Covered

- History and development of Basic principles for research
- ICH- GCP guidelines
- Experimental studies
- Qualitative and quantitative methods of observational studies

## About the Programme

- The course will give knowledge about Recent advances on shared mechanisms underlying neurodegenerative diseases.
- This session helps to give knowledge about Quantification of biomarkers for the assessment of prognosis of disease

## Objective of the Programme

The main objectives of Sir C. R. Reddy College of Pharmaceutical Sciences in organizing this event is

1. To understand neuronal degeneration and acquire state of the art knowledge on clinical and fundamental features of neurodegenerative diseases.
2. To learn about the need of neurodegenerative disease research
3. To impart knowledge on current drug therapy and emerging drug treatment options.

## Topics to be Covered

- Approaches for neurodegenerative disease research
- Biomarkers in these diseases
- The use of machine learning techniques within these fields to provide additional insights to early diagnosis and multimodal analysis.
- Repositioning and development of new treatment

## About the Institute

Sir. C. R. Reddy College of pharmaceutical sciences was started to prepare graduates in pharmacy to meet their ever increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The objectives of the college are to establish and maintain an outstanding professional education Programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transit knowledge regarding drugs, drug products and health to conduct outstanding research and service Programme to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines.

Sir. CRRCOPS runs the UG and PG courses like B.Pharm established in 2007, Pharm.D established in 2014 with 30 seats and M.Pharm in pharmaceutical technology-18 seats, pharmacology-18 seats and pharmaceutical analysis & quality assurance-18 seats.

## About the Department

The goal of the Department of Pharmaceutical Analysis is to concentrate on the creation of analytical techniques employing fresh pairings of tried-and-true techniques and instruments. It entails conducting fundamental research on the composition, stability, identity, and purity of excipients, starting materials, and active pharmaceutical components (API). The department is engaged in post-graduate student instruction and training in analytical sciences related to qualitative and quantitative estimate of natural and synthetic substances in various matrices by application of spectroscopy, chromatography, and analytical procedures.

## About the Programme

As an important chemical pollutant affecting the safety of agricultural products, the on-site and efficient detection of pesticide residues has become a global trend and hotspot in research. These methodologies were developed for simplicity, high sensitivity, and multiresidue detection. This review introduces the currently available technologies based on electrochemistry, optical analysis, biotechnology, and some innovative and novel technologies for the rapid detection of pesticide residues, focusing on the characteristics, research status, and application of the most innovative and novel technologies in the past 10 years, and analyzes challenges and future development prospects. The current review could be a good reference for researchers to choose the appropriate research direction in pesticide residue detection.

## Objective of the Programme

1. To know about the pesticides and their residues
2. To learn about the analysis of residual matter
3. To impart knowledge on its recent advances

## Topics to be Covered

Topics covered

1. Pesticidal analysis
2. Pesticidal residues In Pharmaceutical products
3. Review on the methods of analytical techniques

Learning outcomes :

1. Types of analytical techniques

### About the Institute

Sir. C. R. Reddy College of pharmaceutical sciences was started to prepare graduates in pharmacy to meet their ever increasing need in pharmaceutical industry, drug control, teaching and community pharmacy. The objectives of the college are to establish and maintain an outstanding professional education Programme, to teach the students to become effective pharmacy graduates to meet the needs of the profession, to preserve, augment and transmit knowledge regarding drugs, drug products and health to conduct outstanding research and service Programme to keep pace with the widening knowledge base required for pharmacy graduates and to collaborate with industry and other health disciplines to produce quality medicines.

Sir.CRRCOPS runs the UG and PG courses like B.Pharm established in 2007, Pharm.D established in 2014 with 30 seats and M.Pharm in Pharmaceutical technology-18seats, Pharmacology-18 seats and Pharmaceutical analysis & quality assurance-18 seats.

### About the Department

The Department of Pharmaceutical Analysis focuses on the development of analytical methods using novel combinations of time-tested methods and tools. The composition, stability, identity, and purity of excipients, raw materials, and active pharmaceutical components (API) are all the subject of this fundamental research. The department is actively involved in teaching and training post-graduate students in analytical sciences linked to qualitative and quantitative estimation of natural and synthetic chemicals in various matrices by application of spectroscopy, chromatography, and analytical methods.

### About the Programme

Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance.

### Objective of the Programme

The main objectives of Sir C. R. Reddy College of Pharmaceutical Sciences in organizing this event is

1. To raise consciousness about IPR enforcement.
2. To advocate for IP enforcement and protection

### Topics to be Covered

1. It demands recompense for the loss of profit brought about by market violation.
2. It guards against market violation, which in turn aids in preventing losses like reputational harm.
